Analysing online customer complaints is important for a number of reasons to garner many types of information from customers. Customer complaints contain the direct voice of the customer and unfiltered information about what has happened to quality of both a product and service [1].

CLUSTERING ONLINE CUSTOMER COMPLAINTS

13 Cluster Services Overview. Coherence functionality is based on the concept of cluster services. Each cluster node can participate in (which implies both the ability to provide and to consume) any number of named services. These named services may already exist, which is to say that they may already be running on one or more other cluster nodes, or a cluster node can register new named services.
