Ponds benefit wildlife by providing feeding and nesting habitat, resting areas, and water sources. Ponds that are constructed, maintained, and managed with these uses in mind are a valuable part of Ohio's natural resources. This manual is intended for owners of new ponds, owners of old ponds, or landowners who plan to build a pond.

Pond Management H A N D B O O K

Locating a pond near established wildlife cover will encourage use by birds and other animals. It is possible to develop wildlife cover and travel lanes after the pond is built, but it takes less time and effort to take advantage of what is already there. For more information: Send for the Conservation Department's

year, but if you start in autumn or late winter, it will get established much quicker.

How to build a pond | The Wildlife Trusts

The best ponds for wildlife have shallow margins with a fringe of vegetation and nearby plant cover for amphibians and insects with terrestrial life stages. Why is it like this? Many ponds are artificial and were originally dug for marl (a lime-rich clay spread on fields to reduce acidity) or to provide a water source for livestock.

Ponds | The Wildlife Trusts

The Division of Wildlife's mission is to conserve and improve fish and wildlife resources and their habitats for sustainable use and appreciation by all.

Division of Wildlife

Though not much more detailed than other books on the actual construction of the pond, this book is hugely useful in the stocking of the pond so as to attract the wildlife we seek - notably frogs, toads and newts. And there is detail the likes of which few other books provide, and certainly not so comprehensively.
