1.3. How to find PCI devices manually¶ PCI drivers should have a really good reason for not using the `pci_register_driver()` interface to search for PCI devices. The main reason PCI devices are controlled by multiple drivers is because one PCI device implements several different HW services. E.g. combined serial/parallel port/floppy controller.

Device Drivers Introduction to Linux Device Drivers - Part 1 The Basics

Our driver is going to be a character driver, so we will write the source into the file `/usr/src/linux/drivers/char/mrv4.c`, and its header into `/usr/include/linux/mrv4.h`. The second task is to implement the driver I/O functions. In our case, `mrv4_open()`, `mrv4_read()`, `mrv4_write()`, `mrv4_ioctl()` and
